Letter of Continuity for Brazing

This letter is a record of brazing history for the period between the renewal of certification and updated code or standards. This record must be maintained by the individual for his record of Continuity. A copy of record must be submitted with the application to update to a new standard.

Brazer's Name _____

Address (home) _____

METC Identification No. _____

Date of Original Certification _____

The following is an affirmation and witnessed statement of record for procedure of QB-322(a) of the ASME section IX Boiler and Pressure Vessel Code. Falsification will result in revocation of credential.

Brazer must braze with a qualified procedure every 6 months and maintain his own record.
